Food waste

This bin is for all food waste from households. It is very important to use only compostable bags for the waste in the bin. The food waste is used to make compost that can improve soil fertility and can for example be used in degraded land restoration projects.

Sorting instructions

Paper

The paper bin is for all paper products, such as cardboard, newspapers and magazines, tetra packs and cartons. The paper material needs to be clean to be recyclable. Therefore it is very important that all paper packaging is empty and free of food leftovers, otherwise they belong in the bin for general waste.
